INDEX TO VOLUME 27

The asterisk (*) preceding the page number indicates an original article in the Archives. Subject entries are made for all articles. Author entries are made for original articles and society transactions. Book Reviews, Obituaries and Society Transactions are indexed under these headings in their alphabetical order under the letters B, O and S, respectively.

Abnormalities, developmental defect and mixed tumor of central nervous system, 936

Acetylcholine, efficacy and diagnostic importance of vasodilators in angiospasm of retinal artery, with reference to acetylcholine, 460

Achlorhydria, relation to pernicious anemia, 1491

Achondroplasia, case of, 952

Acid, Carbolic: See Phenol

Acrodynia, case of acrodynia (infantile) of Selter-Swift-Feer in youth, 947

Acromegaly with diabetes mellitus and xanthoma diabeticorum, 724

Adenomas, certain pathologic conditions about chiasm with reference to pituitary adenomas, 196

Adolescence, motor development of children suffering from stammering; neuropsychiatric problems of adolescence, 951

problem of mental disease and delinquency in adolescent, 458

Adson, A. W.: Intramedullary tumor of spinal cord and vascular lesion of cerebrum, *420

Agnosia of fingers and agraphia (psychopathologic study), 444

Agraphia, agnosia of fingers and agraphia (psychopathologic study), 444

and alexia of evolution, 458

Alcoholism, fixation of alcohol in human cortex and subcortical ganglia in alcoholics, 442

light alcoholic intoxication in schizophrenia, 441

Alepol, sulphur, and turpentine injections in persistent psychosis, 451

Alexia: See Aphasia, visual

Allan, W.: Sex ratio in migraine, *1436

Allergy: See Anaphylaxis

All-or-none law, validity of all-or-none law, 459

Alpers, B. J.: Primary fibroblastoma of brain, *270

Amentia and catatonic syndrome, 204

Amnion Horn: See Cornu ammonis

Anaphylaxis, neurological complications of serum treatment with report of case, 1476

Anderson, F. N.: Psychiatric points of view on children's problems, 481

Anemia, pernicious, relation of achlorhydria to, 1491

pernicious, resistant to treatment, 1492

Anesthesia, "avertin" anesthesia in neurologic surgery, 932

chloroform content of brain following anesthesia, 939

Anesthesia—Continued

convulsions during surgical anaesthesia, 454

effects of experimentaly induced anesthesia of extra-ocular muscles in man, 947

Aneurysms, spontaneous subarachnoid hemorrhage and its relation to aneurysms of cerebral blood vessels, *1080

Angina pectoris, operative treatment of, 723

Angioma, angiomatous tumors of nerve centers, 1477

Angiospasm: See Vasomotor System

Aphasia, carbon monoxide poisoning complicated by acute toxic psychosis with catatonic features and later by parkinsonism and sensory aphasia, 1507

visual; alexia and agraphia of evolution, 458

Appel, K. E.: Ephedrine circulatory and glycemic reactions in psychoses, *159

Arachnoid, cystic arachnoiditis of cerebellopontile angle revealed by bilateral cochleovestibular disturbances, 201

Archambault, L.: Progressive facial hemiatrophy; 3 cases, *529

Argyll Robertson Pupils: See under Pupils

Arsenic, neuritis from arsenic and lead; significance of chemical studies in diagnosis, *322

Arsphenamine therapy, herpes zoster during, 455

Arteriosclerosis, cerebral haemorrhage due to causes other than arteriosclerosis, 1474

Artery, action of certain drugs on spinal fluid and on internal jugular venous and systemic arterial pressures of man, *1226

basilar, paradoxical embolism of, 446

internal jugular venous pressure in man, its relationship to cerebrospinal fluid and carotid arterial pressure, *836

retinal, efficacy and diagnostic importance of vasodilations in angiospasm of, with reference to acetylcholine, 460

Arthritis deformans as cause of "ischias" and "meralgia paresthetica," 451

deformans, assimilation of atlas and compression of medulla: clinical significance and pathology of torticollis and localized chronic arthritis deformans of spine, 710

results of sympathetic ganglionectomy and ramisectomy for chronic arthritis, 721

Asthenia, neurocirculatory, peptic ulcer and recurrent hyperthyroidism, 938

Athetosis, pathologic anatomy of pallidal form of, 943

Atrophy, muscular, familial progressive, *645

Avertin: See Tribromethanol

Bagley, C., Jr.: Spontaneous cerebral hemorrhage; discussion of 4 types with surgical consideration, *1133

Bailey, P.: Histologic diagnosis of tumors of brain, *1290

Barrera, S. E.: Action of bulbocapnine in animals with various experimental lesions of nervous system, 1499

Bazett, H. C.: Sensation; depth, distribution and probable identification in prepuce of sensory end-organs concerned in sensations of temperature and touch; thermometric conductivity, *489

Sensation; mode of stimulation of cutaneous sensations of cold and warmth, *1031

Behavior problems, rôle of physical conditions in, 947

Bender, L.: Principles of Gestalt in copied form in mentally defective and schizophrenic persons, *661

Binswanger's chronic progressive subcortical encephalitis, *593

Birth trauma and epilepsy, 699

Bishop, G. H.: Nerve degeneration accompanying experimental poliomyelitis; histologic and functional analysis of normal somatic and autonomic nerves of monkey, *1070

Nerve degeneration in poliomyelitis; rate of depression and disappearance of components of conducted action potential in severed nerves; correlation with histologic degeneration in groups of fibers responsible for various components, *1421

Blake, William Blake: "mad" Blake and his tree full of angels, 953

Blepharospasm, bilateral blepharospasm and "see-saw" blepharospasm of encephalitic origin, 1485

Blood, alkali reserve of blood and urinary hydrogen ion concentration in epileptic persons during and between convulsive seizures, 450

bromide distribution in blood; in vitro experiments of bromide and chloride distributions, 456

colloidal states of, 230

distribution of bromides and chlorides in blood of dogs following oral administration of sodium bromide, 950

distribution of calcium between blood and cerebrospinal fluid in sleep induced by diallyl-barbituric acid; experimental study, *154

lipase, diastase and esterase in multiple sclerosis; possible index of liver dysfunction, *367

lymphocyte reaction in blood picture of syphilis and metasyphilis and its significance for pathogenesis and therapy, 460

pressure; action of certain drugs on spinal fluid and on internal jugular venous and systemic arterial pressure of man, *1226

pressure before and after operation in hyperthyroidism, 455

pressure, behavior of pulse rate, pulse volume and blood pressure normally and under influence of diathermy on brain in normal and in catatonic persons, 452

pressure, effect of ephedrine on, in psychosis, *159

pressure, high; differential diagnosis of tumor of brain; importance of considering renal hypertension with choked disk, *816

pressure, high; neuroretinitis associated with nephritis and hypertension, 952

pressure in schizophrenia, *333

pressure, influence of pain on human arterial pressure, 934

pressure, retinal blood pressure in patients with general arterial hypertension, 459

vessels, epileptic convulsions of dementia paralytica; their relation to sclerosis of cornu ammonis, *138

vessels, intracerebral vascular nerves, *30

Boeke, J.: Degeneration and regeneration of peripheral nervous system, 461

Bone, Paget's disease of cranium, 226

Book Reviews:

A B C of Adler's Psychology; P. Mariet, 244

Amusie; E. Feuchtwanger, 1510

Aphasia in Children; A. G. Ewing, 487

Arbeit und Gesundheit. Part 17. Sammlung aerztlicher Gutachten; Martineck, 1272

Brain and Spinal Cord. A Manual for Study of Morphology and Fibre-Tracts of Central Nervous System; E. Villiger, 759

Brief History of Medicine in Massachusetts; H. R. Viets, 1513

Conditions and Consequences of Human Variability; R. Dodge, 757

Creed of a Biologist; A. S. Warthin, 985

Diagnosis of Nervous Diseases; J. Purves-Stewart, 1514

Diagnostic et thérapeutique par le lipiodol; J. A. Sicard and J. Forestier, 488

Doctor in Court; E. H. Williams, 1514

Doctor of the 1870's and 80's; W. A. Pusey, 1512

Einführung in die neuere Psychologie; E. Saupe, 488

Experimental Social Psychology; G. Murphy and L. B. Murphy, 1513

Gehirnpräparation mittels Zerfaserung. Anleitung zum makroskopischen Studium des Gehirns; J. W. Hultkrantz, 1514

Genie-Problem. Eine Einführung; W. Lange, 753

Genius im Kinde; G. F. Hartlaub, 1271

God Helps Those; F. Künkel, 1268

Grundzüge der Entwicklungsgeschichte der Menschen in vergleichender Darstellung; R. Weissenberg, 1272

Handbuch der biologischen Arbeitsmethoden: Abteilung V. Methoden zum Studium der Funktionen der einzelner Organe des tierischen Organismus. Teil 5 B, Heft 6. Methoden zur Erforschung der Funktionen des Kleinhirns; J. ten Cate, 759

Handbuch der Geisteskrankheiten; O. Bumke, 758

Headache; W. H. Robey, 245

Hérédo-syphilis mentale; P. L. Drouet and J. Hamel, 984

Hirnpathologische Beiträge; K. Schaffer, 487

How to Be Happy Though Human; W. B. Wolfe, 756

Individual Psychological Treatment; E. Wexberg, 242

Individual Psychology; E. Wexberg, 238

Institute for Child Guidance Studies. Selected Reprints; L. G. Lowrey, 758

Internationale Tagung für angewandte Psychopathologie und Psychologie, Wien, 1930; H. Hartmann, M. Pappenheim and E. Stransky, 246

Introduction to Neurology; C. J. Herrick, 1513

Konstitutionstypen der Kinder, W. S. Krasusky, 979

Lebensvorgänge im normalen Knorpel und seine Wucherung bei Akromegalie; J. Erdheim, 1514

Manic-Depressive Psychosis; H. Lundholm, 486

Measurement of Intelligence of Young Children by an Object-Fitting Test; R. E. Atkins, 486

Book Reviews—Continued

Medical Department of United States Army in World War. Volume X. Neuropsychiatry; M. W. Ireland, 758

Medicine: An Historical Outline; M. G. Seelig, 488

Mind at Mischief: Tricks and Deceptions of the Subconscious and How to Cope with Them; W. S. Sadler, 1512

Morbid Personality; S. Lorand, 247

Myotonie atrophique; (maladie de Steinert): Sa place entre la maladie de Thomsen et les myopathies; L. Rouquès, 760

Nervous Indigestion; W. C. Alvarez, 985

Nervous System. An Elementary Handbook of Anatomy and Physiology of Nervous System for Use of Students of Psychology and Neurology; J. D. Lickley, 986

Neuropathischen Knochen- und Gelenk-Affektionen; A. Blencke and B. Blencke, 985

Neurosen des Lebenskampfes; W. Cimbal, 755

Ophthalmo- und Oto-Neurologie. Ein Lehrbuch für Studierende und Aerzte; E. A. Spiegel and I. Sommer, 755

Order of Birth, Parent-Age, and Intelligence; L. L. Thurstone and R. L. Jenkins, 754

Pathology of Internal Diseases; W. Boyd, 247

Phénomènes de répercussivité (système sympathique; système cérébrospinal; les spasmes vasculaires; épilepsie; asthme): Andre Thomas, 1266

Physique and Intellect; D. G. Paterson, 240

Principal Nervous Pathways. Neurological Charts and Schemas with Explanatory Notes; A. T. Rasmussen, 1513

Problems in Psychopathology; T. W. Mitchell, 485

Psychology of Insanity; B. Hart, 488

Recent Advances in Study of Psychoneuroses; M. Culpin, 756

Selected Writings of John Hughlings Jackson. Volume 1. On Epilepsy and Epileptiform Convulsions; J. Taylor, G. Holmes, and F. M. R. Walshe, 757

Sex in Marriage; E. R. Groves and G. H. Groves, 1511

Speech Pathology; L. E. Travis, 983

Studien zur Psychologie und Symptomatologie der progressiven Paralyse; P. Schilder, 753

Studies in Psycho-Expedition; F. Schneersohn, 1509

Sur l'activité spontanée normale et pathologique; A. Barnett, 754

Syndromes cérébelleux mixtes; A. de Almeida Prado, 759

Technique of Psycho-Analysis; E. Glover, 982

Techniques histologiques de neuropathologie; I. Bertrand, 488

Text-Book of Clinical Neurology; I. S. Wechsler, 1514

Text-Book of Neuro-Anatomy; A. Kuntz, 760

Theodor Meynert und seine Zeit; D. Stockert-Meynert, 1511

Tumeurs des centres nerveux et des nerfs périphériques; atlas du cancer; G. Roussy and C. Oberling, 1272

Wunder in der Heilkunde; E. Liek, 248

Bowman, L.: Postvaccinal encephalitis in Holland, 977

Brachial plexus, paralysis following serum therapy for diphtheria, 944

Brain: See also Arachnoid; Cerebellum; Cornu ammonis; Hypothalamus; Medulla Oblongata; Meninges; etc.

Brain—Continued

abscess, conjugate deviation of head and eyes in diagnosis and localization of, 700

action of pituitrin introduced into ventricle, 194

activity of suckling, 1472

acute intracranial edema complicating otitis media, 1497

atrophy; Pick's disease in brothers, 198,

behavior of pulse rate, pulse volume and blood pressure normally and under influence of diathermy on brain in normal and in catatonic persons, 452

central tegmental tract, 1491

chloroform content of brain following anesthesia, 939

choroid plexus psammoma in right lateral ventricle, 441

comparative anatomy of so-called accessory abducens nucleus, 457

congenital hypoplasia of olivo-pontocerebellar tracts, *1402

conjugate deviation of head and eyes in disorders of brain stem, 433

cortex, restitution in injuries of, 736

counteractive effect of tribomethanol (avertin) on stimulatory response to pituitrin injected in ventricle, 195

cystic arachnoiditis of cerebrellopontile angle revealed by bilateral cochleovestibular disturbances, 201

disease; chronic progressive vascular subcortical encephalopathy; chronic progressive subcortical encephalitis of Binswanger, *593

disease; progressive pallidal degeneration; new clinicopathologic syndrome, *1

disease; toxic encephalopathy in measles, *1209

disease, 2 cases of Lindau's disease, 210

disorders of optic nystagmus observed in lesions of frontal lobe, 960

effect of lecithin on cerebral cortex, 1495

effects of total removal of left temporal lobe in right-handed person; localization of areas of brain concerned with speech, 221

encephalography and ventriculography; value in localization and treatment of intracranial lesions, *1310

encephalography, head injuries; effects and their appraisal; encephalographic observations, *791

experimental work on bacterially-produced nervous tissue lesions, 440

extradural ventral chondromas; favorite sites; spinal cord and root symptoms they produce and surgical treatment, 224

fibroblastoma, primary, *270

fixation of alcohol in human cortex and subcortical ganglia in alcoholics, 442

function of frontal lobe, 436

function of frontal lobes in dogs, experimental study, 961

functional changes in disturbances of spatial functions in perception and movement, 967

hemangioma; two cases of capillary hemangioma, 1 of cerebellum, other of medulla, 210

hemorrhage due to causes other than arteriosclerosis, 1474

hemorrhage, encapsulated, frequency and pathology, *1441

hemorrhage; spontaneous cerebral hemorrhage, discussion of 4 types with surgical consideration, *1133

Brain—Continued

hemorrhage; spontaneous subarachnoid hemorrhage; its relation to aneurysms of cerebral blood vessels, *1080

hepatic disease and brain; pathogenesis of Wilson's disease and of pseudosclerosis, 439

histologic changes in brain in cases of fatal injury to head; reaction of microglia and oligodendroglia, *605

histologic studies of brain in cases of fatal injury to head; reaction of classic neurologia, *1342

in malignant endocarditis, *1175

intracerebral vascular nerves, *30

morphogenetic factors in development of cerebral hemispheres, 957

painful contractures in flexion of lower extremities from unilateral cerebral lesions, 1492

potential changes in isolated brain stem of goldfish, 717

release phenomenon in electrical stimulation of "motor" cerebral cortex, 957

restitution in brain, principle of, 967

retinal arterial tension in certain cerebral syndromes, 207

small foci of demyelinization in cortex and spinal cord in diffuse sclerosis; their similarity to those of disseminated sclerosis and dementia paralytica, *1380

softening of temporal lobe with clinical picture of pseudotumor cerebri, 199

trauma and its relation to mental deficiency, 724

trauma, disturbances of reflexes in, 966

tumors, classification of, and its practical application, 952

tumors, diagnosis and treatment of; review of symposium at First International Neurological Congress, *1447

tumors; differential diagnosis of tumor of brain; importance of considering renal hypertension with choked disk, *816

tumors; difficulties of differential diagnosis between hypertensive form of encephalitis lethargica and cerebral tumor, 453

tumors, histologic diagnosis of, *1290

tumors; intracranial tumor with unequal choked disk; relationship between side of greater choking and position of tumor, *828

tumors; intramedullary tumor of spinal cord and vascular lesion of cerebrum, *420

tumors, ocular symptoms in diagnosis of, 950

tumors of basal ganglia, *249

tumors of frontal lobe, exophthalmos from, 460

tumors of sheaths of nervous system, *1298

tumors of stem: clinical study of 5 cases with autopsy findings, 456

tumors, optic atrophy without papilledema in tumor of frontal lobe complicated by hydrocephalus, 1490

tumors, spinal fluid in differential diagnosis of, *691

tumors, surgical mortality percentages pertaining to series of 2,000 verified intracranial tumors; standards of computation, *1273

tumors, 2 cases, 1504

vascular spasms; clinical and experimental study, 938

Brain—Continued

ventriculography and encephalography, value in localization and treatment of intracranial lesions, *1310

Bromide distribution in blood: distribution of bromides and chlorides in blood of dogs following oral administration of sodium *bromide, 950

distribution in blood; in vitro experiments of bromide and chloride distributions, 456

Bulbocapnine, action of, in animals with various experimental lesions of nervous system, 1499

Burr, H. S.: Morphogenetic factors in development of cerebral hemispheres, 957

Byers, R. K.: Transection of spinal cord in new-born; case with autopsy and comparison with normal cord at same age, *585

Calcium, distribution of calcium between blood and spinal fluid in sleep induced by diallylbarbituric acid; an experimental study, *154

Cancer, carcinomatous pachymeningitis, report of case, *425

Carbolic Acid: See Phenol

Carbon dioxide, effect of carbon dioxide and oxygen on catatonic states, 232

monoxide, case of carbon monoxide poisoning complicated by acute toxic psychosis with catatonic features and later by parkinsonism and sensory aphasia, 1507

monoxide poisoning complicated by multiple neuritis and unilateral parkinsonism, 1506

Catatonia: See Dementia Praecox

Cauda equina: See Spinal Cord

Cellini, delinquency and Florentine court records of Benvenuto Cellini, as reconstructed in light of legal code of his time and of rare unpublished documents, 457

Cerebellum abscess, case of, 941

Cajal-Smirnow fibers; normal component of human cerebellum, 1489

congenital hypoplasia of oliva-pontocerebellar tracts, *1402

restitution in cerebellar lesions, 731

symptom, (pendulum movement of arm), 972

Cerebrospinal Fluid, action of certain drugs on spinal fluid and on internal jugular venous and systemic arterial presure, *1226

atlanto-occipital puncture: comparative value of cisternal and lumbar puncture, 718

cell count and protein content in epilepsy, 699

distribution of calcium between blood and spinal fluid in sleep induced by diallylbarbituric acid; experimental study, *154

examination by ultra-violet light, 452

in differential diagnosis of brain tumor, *691

internal jugular venous pressure in man: its relationship to spinal fluid and carotid arterial pressures, *836

practical and theoretical significance of protein determinations in spinal fluid in neurologic cases, 444

simultaneous registration of intra-ocular pressure and pressure in spinal fluid, 211, 448

sugar curve after oral administration of dextrose, 700

Cerebrum: See Brain

Cherry, I. S.: Blood lipase, diastase and esterase in multiple sclerosis; possible index of liver dysfunction, *367

Children, neurologic problems in childhood, *525
psychiatric points of view on children's problems, 481
Chloride, distribution of bromides and chlorides in blood of dogs following oral administration of sodium bromide, 950
Chloroform content of brain following anesthesia, 939
Choked disk: See Neuritis, optic
Chondromas, extradural ventral chondromas; favorite sites; spinal cord and root symptoms they produce and surgical treatment, 224
Chorea, chronic progressive chorea; pathogenesis and mechanism, histopathologic study, *906
Huntington's, convulsive manifestations in, 1490
localization and pathophysiology of choreic movement, 182
treatment with phenyl-ethyl-hydantoin, 454
Choroid, case of choroid plexus psammoma in right lateral ventricle, 441
hydrocephalus in infant with vestiges of choroid plexus in fourth ventricle only, *406
Ciliary activity, disturibution of branchial nerve in Mytilus edulis and its relation to problem of nervous control of ciliary activity, 455
Cisterna puncture, atlanto-occipital puncture: comparative value of cisternal and lumbar puncture, 718
Claiborn, L. N.: Experimental study of function of frontal lobes in dogs, 961
Clérambault-Kandinsky symptom complex, 937
Cleveland, D. A.: Serologic study of multiple sclerosis, *375
Cobb, S.: Causes of epilepsy, *1245
Cohen, I.: Postoperative results of chronic right-sided hematoma with ipsolateral pyramidal tract signs, 219
Color changes in fundulus with consideration of xanthophores, 941
Contracture, painful contractures in flexion of lower extremities from unilateral cerebral lesions, 1492
Convulsions during surgical anaesthesia, 454
epileptic convulsions of dementia paralytica: their relation to sclerosis of cornu ammonis, *138
head injuries: effects and their appraisal: experimental studies of induced convulsions and ventricular distortion in cat, *776
Cornu ammonis, epileptic convusions of dementia paralytica; their relation to sclerosis of cornu ammonis, *138
Courville, C. B.: Histologic changes in brain in cases of fatal injury to head; reaction of microglia and oligodendroglia, *605
Histologic studies of brain in cases of fatal injury to head; reaction of classic neuroglia, *1342
Covell, W. P.: Nerve degeneration in poliomyelitis: vital staining methods with neutral red applied to nerve degeneration, *518
Crandall, L. A., Jr.: Blood lipase, diastase and esterase in multiple sclerosis; possible index of liver dysfunction, *367
Cranium, fractures and intracranial injuries, management of, 1486
osteitis fibrosa cystica of skull associated with hemianopia and psychotic symptoms, *45
Paget's disease of, 226
Criminals, biologic types among, 1470
Criminology, index of celebrated cases, 460
significance of Lombroso for modern biologic criminology, 449
Crothers, B.: Neurologic problems in childhood, *525
Cushing, H.: Surgical mortality percentages pertaining to series of 2,000 vertified intracranial tumors; standards of computation, *1273

Dandy, W. E.: Certain functions of roots and ganglia of cranial sensory nerves, *22
Effects of total removal of left temporal lobe in right-handed persons; localization of areas of brain concerned with speech, 221
Davis, L.: Rôle of sympathetic nervous system in production of pain in head, *282
Davison, C.: Amyotrophic lateral sclerosis with mental symptoms; clinicopathologic study, *859
Chronic progressive chorea; pathogenesis and mechanism; histopathologic study, *906
Delinquency and Florentine court records of Benvenuto Cellini, as reconstructed in light of legal code of his time and of rare unpublished documents, 457
problem of mental disease and delinquency in adolescent, 458
Dementia Paralytica: See Paralysis, general
praecox, amentia and catatonic syndrome, 204
praecox and tuberculosis, 449
praecox, blood pressure in schizophrenia, *333
praecox, cerebellar disorders, in, 209
praecox, effect of carbon dioxide and oxygen on catatonic states, 232
praecox, light alcoholic intoxication in schizophrenia, 441
praecox, principles of Gestalt in copied form in mentally defective and schizophrenic persons, *661
praecox, reflex response latencies in manic and depressive cases of cyclothymic group and in cases of catatonic stupor of schizophrenic group, *687
Demme, H.: Experimental poliomyelitis, 972
Dengue, neurotropism of virus of, 951
Dextrose, sugar curve in cerebrospinal fluid after oral administration of dextrose, 700
Diabetes insipidus, experimental, histopathology of, 445
mellitus, acromegaly with diabetes mellitus and xanthoma diabeticorum, 724
Diallyl-barbituric acid, distribution of calcium between blood and cerebrospinal fluid in sleep induced by diallyl-barbituric acid, experimental study, *154
Diamond, I. B.: Brain changes in malignant endocarditis, *1175
Diastase, blood lipase, diastase and esterase in multiple sclerosis; possible index of liver dysfunction, *367
Diathermy, behavior of pulse rate, pulse volume and blood pressure normally and under influence of diathermy on brain in normal and in catatonic persons, 452

Diphtheria, serum therapy for, followed by paralysis of brachial plexus, 944

Diplegia, syndrome of polyneuritis with facial diplegia, *79

Diseases, psychic disturbances in somatic diseases, 1486

Dixon, H. H.: Familial progressive muscular atrophy, *645

Dodge, R.: Disorders of optic nystagmus observed in lesions of frontal lobe, 960

Dorsey, J. M.: Reflex response latencies in manic and depressive cases of cyclothymic group and in cases of catatonic stupor of schizophrenic group, *687

Doyle, J. B.: Neuritis from arsenic and lead; significance of chemical studies in diagnosis, *322

Drugs, action of certain drugs on spinal fluid and on internal jugular venous and systemic arterial pressures of man, *1226

Dura mater, traumatic subdural hematoma with reference to latent interval, *847

Dusser de Barenne, J. G.: A release phenomenon in electrical stimulation of "motor" cerebral cortex, 957

Dystonia: See under Muscle

Dystrophy, muscular, pulse curve in case of progressive dystrophy, *1444

Ear, labyrinth of Bufo vulgaris japonicus larva; morphologic study of perilymphatic space in connection with membranous labyrinth and auditory capsule, 453

vestibular function and vomiting of pregnancy, 208

Eckel, J. L.: Unusual cases of syphilis of nervous system, clinicopathologic study, *881

Electric shock, "fugue" following severe shock, 949

Elsberg, C. A.: Extradural ventral chondromas; favorite sites; spinal cord and root symptoms they produce and surgical treatment, 224

Embolism, inferior hemianopia from retinal embolism and angiospasm, 945

paradoxical, of basilar artery, 446

Encephalitis: See also Encephalomyelitis

ambulatory automatism in hypertonic encephalitis, 456

avulsion of both eyes and optic nerves by patient with postencephalitic condition, 1497

bilateral blepharospasm and "see-saw" blepharospasm of encephalitic origin, 1485

chronic progressive vascular subcortical encephalopathy; chronic progressive subcortical encephalitis of Binswanger, *593

difficulties of differential diagnosis between hypertensive form of encephalitis lethargica and cerebral tumor, 453

histopathology of postencephalitic diseases, 719

in measles, *1209

late ocular manifestations in, 428

mental syndromes following, 430

neurologic sequelae of, 184, 191

periaxialis diffusa (Schilder's disease), 209

postvaccinal, in Holland, 977

septicaemia and encephalitis in relation to vaccination, 1495

toxic encephalopathy in measles, *1209

unique type of speech disturbance in, *172

Encephalography: See under Brain

Encephalomyelitis, postvaccinial, etiology of, 706

problem of, and multiple sclerosis, 970

Encephalopathy: See Brain, disease

Endocarditis, malignant, brain changes in, *1175

Eonism or transvestism, 209

Ependymitis, pathology of, 207

Ephedrine circulatory and glycemic reactions in psychoses, *159

Epilepsy and birth trauma, 699

alkali reserve of blood and urinary hydrogen ion concentration in epileptic persons during and between convulsive seizures, 450

causes of, *1245

cell count and protein content of spinal fluid in, 699

clinic for, 695

clinical and therapeutic experiences with, 698

dehydration method in, 940

epileptic convulsions of dementia paralytica; their relation to sclerosis of cornu ammonis, *138

epileptiform seizures of Jacksonian character; analysis of 130 cases, 1493

"genuine epilepsy": microscopic changes in capillary system as probable etiologic factor, 718

neurosomatic deterioration in epilepsy; clinicopathologic contribution to concept with report of 2 cases, *113

organic symptoms from central nervous system in so-called genuine epilepsy, 698

pathologic anatomy in, 968

pathophysiology of, 696

physiologic and chemical basis of starvation, 700

surgical point of view in treatment for, 698

treatment for, 697

Esterase, blood lipase, diastase and esterase in multiple sclerosis; possible index of liver dysfunction, *367

Exophthalmos from tumor of frontal lobe, 460

Eye: See also under special structures of eyes, i. e., Optic chiasm; Retina; etc.

action of drugs on vascular and muscular factors controlling intra-ocular pressure, 712

avulsion of both eyes and optic nerves by patient with post-encephalitic condition, 1497

conjugate deviation of head and eyes in disorders of brain stem, 433

conjugate deviation of head and eyes: its value in diagnosis and localization of abscess of brain, 700

movements, nervous mechanism of associated eye movements (Andreas Högyes), 929

simultaneous registration of intra-ocular pressure and pressure in spinal fluid, 211, 448

Face, masticator facial hydrorrhea forming part of facio-occipito-sympathetic syndrome, 203

small foci of demyelinization in cortex and spinal cord in diffuse sclerosis; their similarity to those of disseminated sclerosis and dementia paralytica, *1380

Scotoma, bitemporal paracentral scotoma, 716

Sedatives, comparative study of sedatives employed in psychoneuroses, 956

Sella Turcica: See also Pituitary Body

alterations in structure as revealed by roentgen ray, *305

Sensation, depth, distribution and probable identification in prepuce of sensory end-organs concerned in sensations of temperature and touch; thermometric conductivity, *489

studies; mode of stimulation of cutaneous sensations of cold and warmth, *1031

Serum treatment, neurological complications, with report of case, 1476

Sexual function; neurohypophysis and erection, 459

perversions in animals, 948

Shelden, W. D.: Neuritis from arsenic and lead; significance of chemical studies in diagnosis, *322

Shlionsky, H.: Chronic progressive chorea; pathogenesis and mechanism; histopathologic study, *906

Skin, cutaneous sensory thresholds in normal conditions and during cortical stimulation and fatigue, 208

nerve endings in skin of hand, 435

rôle played by cutaneous senses in spatial perceptions, 1488

studies in sensation; mode of stimulation of cutaneous sensations of cold and warmth, *1031

Sleep, clinical researches in narcolepsy, 951

Sleeper, F. H.: Blood pressure in schizophrenia, *333

Smallpox vaccination, septicemia and encephalitis in relation to vaccination, 1495

Society, American Neurological Association, 427

American Orthopsychiatric Association, 427

Tenth International Congress of Psychology, 175

Society Transactions:

Chicago Neurological Society, 226, 1504

First International Neurological Congress, 212

German Neurological Society, 461, 725, 966

Los Angeles Society of Neurology and Psychiatry, 481

New York Academy of Medicine, Section of Neurology and Psychiatry and New York Neurological Society, 219, 1497

New York Neurological Society, 957

Philadelphia Psychiatric Society, 953

Sodium bromide, distribution of bromides and chlorides in blood of dogs following oral administration of sodium bromide, 950

Solomon, A. P.: Case of carbon monoxide poisoning complicated by acute toxic psychosis with catatonic features and later by parkinsonism and sensory aphasia, 1507

Carbon monoxide poisoning complicated by multiple neuritis and unilateral parkinsonism, 1506

Space perception, rôle played by cutaneous senses in spatial perceptions, 1488

Spatz, H.: Morphologic basis for restitution in central nervous system, 470

Speech defects, motor development of children suffering from stammering; neuropsychiatric problems of adolescence, 951

effects of total removal of left temporal lobe in right-handed person; localization of areas of brain concerned with speech, 221

unique type of speech disturbance in epidemic encephalitis, *172

Spinal Cord: See also Meninges; Nervous System

extradural ventral chondromas; favorite sites; spinal cord and root symptoms they produce and surgical treatment, 224

heteroplastic transplantations of embryonic spinal cord segments in amblystoma, 946

intramedullary tumor of spinal cord and vascular lesion of cerebrum, *420

localizing significance of impaired respiratory movements in lesions of, 1494

Spinal Cord—Continued

pathology of spinal disease in affections of vertebral column, 1478

recurrence of tumors in spinal cord, 946

restitution in interruption of, 728

small foci of demyelinization in cortex and spinal cord in diffuse sclerosis; their similarity to those of disseminated sclerosis and dementia paralytica, *1380

transection of spinal cord in new-born; case with autopsy and comparison with normal cord at same age, *585

tumors involving cauda equina; review of clinical features and differential diagnosis, 193

Spinal Puncture, atlanto-occipital puncture: comparative value of cisternal and lumbar puncture, 718

Spine, assimilation of atlas and compression of medulla: clinical significance and pathology of torticollis and localized chronic arthritis deformans of spine, 710

crush fractures of, manipulative reduction of, 951

pathology of spinal disease in affections of vertebral column, 1478

Spondylitis deformans, 709

syphilitic, 2 cases, 1491

Springlova, M.: Lissauer's dementia paralytica, clinical and pathologic study, *987

Staining, investigation on microglia and oligodendroglia; vital staining, 715

rapid and permanent method for staining myelin sheaths, 713

Stammering: See under Speech

Status marmoratus, rigid progressive syndrome with spasm of forward torsion, 723

Stevenson, L. D.: Head injuries; effects and their appraisal; rôle of microglia, *784

Stomach, sympathetic innervation of stomach; effect of stimulation of peri-arterial nerves on stomach and small intestine, 443

Straüssler, E.: Problem of encephalomyelitis and multiple sclerosis, 970

Strauss, I.: Spontaneous subarachnoid hemorrhage, relation to aneurysms of cerebral blood vessels, *1080

Stuttering: See under Speech

Subarachnoid Space: See Meninges

Sulfosin, pyrexial treatment of G. P. I. with, 447

Sulphur, turpentine and alepol injections in persistent psychosis, 451

Syphilis, lymphocyte reaction in blood picture of syphilis and metasyphilis, and its significance for pathogenesis and therapy, 460

malarial therapy of neurosyphilis other than uncomplicated dementia paralytica, 942

prognostic import of negative spinal fluid in early and latent syphilis, 1495

subarachnoid hemorrhages due to, 1480

unusual cases of syphilis of nervous system; clinicopathologic study, *881

Tabes dorsalis, treatment for tabes, 977

Taylor, E. W.: Syndrome of polyneuritis with facial diplegia, *79

Teeth, rôle of anterior lobe of pituitary gland in growth, with reference to teeth and maxillae, 714

Tegmental tract, central, 1491

Temperature; depth, distribution and probable identification in prepuce of sensory end-organs concerned in sensations of temperature and touch; thermometric conductivity, *489

Tetanus, treatment by intrathecal injection of carbolic acid, 204

Tetany, human tetany, 452
induction of tetany in rachitic rats by means of normal diet, 722

Thyroid, hyperthyroidism; blood pressure before and after operation in, 455
recurrent hyperthyroidism, neurocirculatory asthenia and peptic ulcer, 938

Tic douloureux, certain functions of roots and ganglia of cranial sensory nerves, *22

Torticollis, assimilation of atlas and compression of medulla, clinical significance and pathology of torticollis and localized chronic arthritis deformans of spine, 710

Touch; depth, distribution and probable identification in prepuce of sensory end-organs concerned in sensations of temperature and touch; thermometric conductivity, *489

Transplantations, heteroplastic, of embryonic spinal-cord segments in ambystoma, 946

Transvestism or eonism, 209

Travis, L. E.: Reflex response latencies in manic and depressive cases of cyclothymic group and in cases of catatonic stupor of schizophrenic group, *687

Tribromethanol, avertin anesthesia in neurologic surgery, 932
counteractive effect of tribromethanol (avertin) on stimulatory response to pituitrin injected in ventricle, 195

Tryparsamide therapy, 945

Tuber Cinereum: See Hypothalamus

Tuberculosis and dementia praecox, 449

Tumor: See Cancer; and under names of organs and regions, i. e., Brain, tumors; Nervous System, tumor; etc.

Turpentine, sulphur, and alepol injections in persistent psychosis, 451

Twins, mongolism in one of twins, 724

Ultra-violet light, examination by ultra-violet light, 452

Urine, alkali reserve of blood and urinary hydrogen ion concentration in epileptic persons during and between convulsive seizures, 450

Vaccination, Encephalitis following: See under Encephalitis

Vasomotor system; angiospasm, efficacy and diagnostic importance of vasodilators in angiospasm of retinal artery with reference to acetylcholine, 460
inferior hemianopia from retinal embolism and angiospasm, 945
mechanism of vasodilatation following stimulation of antidromic nerves, 1496
multiple cerebral spinal angiospasms simulating multiple sclerosis, 1495

Vein, internal jugular venous pressure in man; relationship to spinal fluid and carotid arterial pressures, *836
jugular; action of certain drugs on spinal fluid and on internal jugular venous and systemic arterial pressures of man, *1226

Ventriculography: See under Brain

Vertigo, aural; phenomena of Ménière's disease, 720

Vision, diagnostic scales of 1 degree and 0.17 degree form field stimuli for 8 principal meridional quadrants taken separately, 931
hallucinations in hemianopic visual field, 438

Vomiting of pregnancy; vestibular function, 208

Wartenberg, R.: A cerebellar symptom, 972

Watkins, H. M.: Diagnosis, treatment and training of feebleminded, 954

Wechsler, I. S.: Amyotrophic lateral sclerosis with mental symptoms; clinicopathologic study, *859

Weil, A.: Serologic study of multiple sclerosis, *375

Weiss, B. P.: Comparative study of sedatives employed in psychoneuroses, 956

von Weizsäcker: Functional changes in disturbances of spatial functions in perception and movement, 967

Wertham, F.: Small foci of demyelinization in cortex and spinal cord in diffuse sclerosis; their similarity to those of disseminated sclerosis and dementia paralytica, *1380

Williams, R. G.: Sensation; depth, distribution and probable identification in prepuce of sensory end-organs concerned in sensations of temperature and touch; thermometric conductivity, *489

Wilson's Disease: See under Lenticular nucleus

Winkelman, N. W.: Progressive pallidal degeneration; new clinicopathologic syndrome, *1
Unusual cases of syphilis of nervous system; clinicopathologic study, *881

Wortis, S. B.: Head injuries; effects and their appraisal; experimental studies of induced convulsions and ventricular distortion in cat, *776

Wright, F.: Colloidal states of blood, 230

Wry-neck: See Torticollis

Xanthoma diabeticorum, acromegaly with diabetes mellitus and xanthoma diabeticorum, 724

Yakovlev, P. I.: Neurosomatic deterioration in epilepsy; clinicopathologic contribution to concept with report of 2 cases, *113

Yaskin, J. C.: Primary fibroblastoma of brain, *270

Zabriskie, E. G.: Family periodic paralysis; report of case, 220

Zimmerman, H. M.: Congenital hypoplasia of olivo-pontocerebellar tracts, *1402
